PROFESSIONAL EXPERIENCE

Technical Writer

Vneuron Risk and Compliance

January 2024 — Present Tunis, Tunisia

- **Current focus** : building the full documentation set from scratch for **Reis™ TBML** (Trade Based Money Laundering), Vneuron's newest compliance product — user guides, admin guides, API references, test scenarios, and release notes, alongside development.
- Write and edit comprehensive technical documentation : API guides, technical specifications, release notes, user guides and admin guides (in English and French) in Confluence, for the various solutions developed :
 - **Reis™ TBML** : trade based money laundering detection (current product launch).
 - **Reis™ KYC** : onboarding and customer screening platform for financial institutions.
 - **Reis™ AML** : anti money laundering and counter terrorism financing solution.
 - Other modules of the Reis™ RCS suite, deployed across 250+ financial institutions in 45+ countries.
- Curate a 700+ page Confluence knowledge base used by 50+ banking clients and internal teams. Supported 3 release cycles and the launch of 1 new product over 2 years.
- Produce API documentation from Swagger / OpenAPI specifications and build the associated Postman collections to illustrate, validate, and document endpoints. Tools : Confluence
Swagger / OpenAPI Postman .
- Perform thorough manual testing of new features and collaborate with developers, product managers, and QA engineers to produce accurate, comprehensive documentation.
- Contribute to UI / UX writing for product interfaces and to translation work across multiple languages.
- Participate in code and design reviews to ensure the technical accuracy and completeness of documentation. File Jira tickets to request product evolutions identified during writing.
- Contribute to defining internal documentation standards and best practices (templates, style guide, conventions adopted across the engineering team) to improve quality and consistency.
- Participate in internal demos of new features for the various teams, and in Agile / Scrum ceremonies every sprint.

Cloud & DevOps Intern

Vneuron

February 2026 — Present (6 months) Tunis, Tunisia

- Contribute to cloud and DevOps tasks on AWS (Docker, Kubernetes, deployment workflows), build Grafana dashboards for monitoring, and document infrastructure setups and procedures.

IoT Engineer — End of Studies Internship

SAFRAN Group

2023 (6 months) Tunisia

- Designed a real time KPI monitoring solution (Raspberry Pi, MQTT, Arduino) with operational dashboards and complete technical documentation for internal handover.

PROJECTS

Terraform Modules & Auto Generated Documentation

- Personal docs as code project: Terraform modules for AWS (VPC, EC2, S3) with reference documentation generated from the source via terraform docs, and a GitHub Actions workflow for continuous validation and redeployment of the docs. Tools: Terraform AWS
GitHub Actions Markdown .

Postman Collection & Automated API Tests

- Postman collection covering authentication, CRUD flows, and common error cases for a REST API, doubling as runnable documentation. Integrated Newman into GitHub Actions to run the suite on each push. Tools: Postman Newman GitHub Actions .

EDUCATION

Engineering Degree in Cloud Computing & DevOps

iTeam University, Tunis

2023 — 2026

Bachelor's Degree in Computer Engineering
ISTIC · IoT and Embedded Systems

2020 — 2023

SKILLS

Documentation

Technical Writing User Guides
Admin Guides API Documentation
Release Notes UX Writing Markdown
Structured Authoring

Authoring Tools

Confluence Swagger / OpenAPI
Postman Jira Git GitHub

Testing & QA

Manual Testing Test Cases UAT
Defect Tracking API Testing

Methodologies

Agile / Scrum Docs as Code CI / CD

Cloud / DevOps

AWS Docker Kubernetes Terraform
Grafana GitHub Actions

Programming

Python JavaScript TypeScript
HTML / CSS Bash SQL
